7/17/2025	Called to check Bike/ walk path covered with water ,in the park area . Called to provide a inspection of a Problem. Inspection rate is $130.00 per hour Foreman & tool Truck Includes travel time . Writer found the path ,covered with water . It appears there is like a small pond area on the house side of the path . The other side is a low area holding a lot of water also . Writer was unable to determine if there was a pipe under the path that may be plugged ? Writer walked around the area looking for a rear yard catch basin ,i did not find one . Both low spots on the path ,are full of water including the path . There is no easy solution to this problem .I could suggest that you raise this area of the path with asphalt , you could fill in the low spots with dirt and stabilize the area with grass. You could have a landscape crew install edge drain from both sides of the path 100' each area with stone to divert the water away from the low spots that collect the water each time it rains !!!!! This area is a mess with no simple solution to fix the problem . Good luck Bruce Inspection is completed Thanks Bruce	2	130.00	260.00

Total	$260.00
Payments/Credits	$0.00
Balance Due	$260.00
